Description

When a user tries to register on the website and enters a password shorter than the required minimum length, the system accepts the input without showing an error message. The registration form should validate password length and display an appropriate warning (e.g., "Password must be at least 6 characters long").123321

Steps to Reproduce:

1. Go to the registration page (<https://www.gate31.ru/registration>).
2. Enter a valid phone number (e.g., 88005553535).
3. Enter a valid email address (e.g., test@mail.ru).
4. Enter a short password (e.g., "11a").
5. Confirm the password.
6. Click **Register**.

Expected Result:

An error message appears indicating that the password is too short.

Actual Result:

No error message appears, and the registration attempt proceeds as if the password were valid.

Environment:

- Website: gate31.ru
- Browser: Google Chrome 142.0.7444.60 / Windows 10
- Build: Production

Severity: Medium

Priority: High
